EXPERIENCE

Frontend Software Engineer Intern

May 2026 – August 2026

Zinnia Tech Solutions

Boulder, CO

- Implemented and maintained frontend features in Next.js across Zinnia's production websites
- Integrated a headless content management system (CMS) with Zinnia's frontend, enabling non-technical content updates and reducing the effort required for routine website changes
- Built user interface (UI) pages for a greenfield project using a custom component library
- Used AI development tools, including Claude Code, to accelerate frontend development workflows
- Worked within Agile sprints and daily standups, using Jira to track and complete development tickets

Undergraduate Research Fellow

June 2023 – December 2025

Colorado Center for Astrodynamics Research: LAIR Lab

Boulder, CO

- Developed a full-stack web application to monitor and retrieve data from data acquisition (DAQ) sites measuring VLF radio waves
- Built a WebSocket API using AWS API Gateway, Lambda, and DynamoDB, enabling bidirectional communication between the website and 11 DAQ sites in under one second
- Built a relational PostgreSQL database with multiple related tables supporting the website backend
- Built a responsive monitoring and data-retrieval frontend using Next.js and Tailwind CSS
- Developed an Node.js/Express.js REST API connecting the website, PostgreSQL database, and network-attached storage server (NAS), enabling users to view and download NAS files through the website
- Integrated the Python DAQ software with the Express.js REST API to auto upload generated files to NAS

EDUCATION

University of Colorado Boulder

August 2022 – May 2026

Bachelor of Science in Computer Science | GPA: 3.7

Boulder, CO

PROJECTS

Checkers | C++, Qt

April 2024 – May 2024

- Built a two-player checkers game in C++ with a graphical interface using Qt
- Implemented turn management, chain attacks, and game-ending logic for wins and where no legal moves remain

Personal Website | SvelteKit, Tailwind, TypeScript

June 2023 – July 2023

- Built a personal portfolio website using SvelteKit, Tailwind CSS, and TypeScript, featuring transition animations on page load and scroll

Star Wars Hub | Firebase, React, Tailwind, TypeScript

April 2023

- Developed a React and Firebase forum application with functionality for creating, editing, and deleting posts
- Implemented Firestore-backed persistent storage for post interactions including likes and comments, with support for titles, images, and subtitles

SKILLS

Languages: C, C++, CSS, HTML, Java, JavaScript, Python, SQL, TypeScript

Frameworks & Libraries: Bootstrap, Express.js, Jest, Next.js, Qt, React, Storybook, SvelteKit, Tailwind CSS

Databases: DynamoDB, Firebase, Firestore, MySQL, PostgreSQL, Supabase

Cloud & APIs: AWS, AWS API Gateway, AWS Lambda, HTTP, REST APIs, WebSockets

Tools & Technologies: Claude Code, Codex, Docker, Docker Compose, Git, Jira, Linux, Node.js, VS Code

Development: Agile Methodology, AI-Assisted Development, API Integration, CRUD, Frontend Development, Full-Stack Development, Responsive Web Design, Unit Testing
